

# Where the Water Begins

## Land Management Practices for Marine Shoreline & Bluff Properties

Is your marine bluff or beach property eroding or jeopardizing your house? Do you want to manage vegetation to stabilize slopes while maintaining a beautiful view of Puget Sound?

The King Conservation District invites you to attend a FREE workshop developed for property owners along the marine shorelines of King County. The workshop will provide participants with an opportunity to learn about the ecological, geological, and vegetation management issues associated with owning property *Where the Water Begins*.

### Topics

- Understanding the Ecology of Marine Nearshore and Riparian Ecology
- Recognizing Coastal Geological Hazards
- Using Native Vegetation to Reduce Erosion & Improve Fish and Wildlife Habitat

### Who Should Attend

- Landowners interested in stable natural marine shorelines & in reducing the potential for erosion and landslides

### Workshop Dates & Location

Saturday, May 29th

Normandy Park City Hall, Normandy Park WA

Saturday, June 12th

Vashon Maury Island Land Trust, Vashon WA

Saturday, June 26th

Discovery Park ELC, Seattle WA
